

Survey Study on the Experiences of People with Cerebellar Ataxia

The CO Motor Speech Lab at the University of Colorado Boulder is conducting a survey study on the experiences of people with cerebellar ataxia with speech therapy. The survey will take about 20-30 minutes to complete and participants who complete the full survey will receive a \$15 gift card of their choice through Tango. You are eligible to participate in the survey if you are over 18 years old, live in the United States, have been diagnosed with cerebellar ataxia, read and write English, and do not have Multiple Sclerosis (MS), Multiple Systems Atrophy (MSA), Parkinson's disease, or a cognitive impairment that would prevent you from being able to complete the survey questions.

For more information about the survey study, please contact Dr. Allison Hilger at Allison.hilger@colorado.edu. To complete the survey, click on the following link https://cuboulder.qualtrics.com/jfe/form/SV_238QwMwxqX2MM85. Before completing the survey, you will be asked to complete a consent form and eligibility questions. The CO Motor Speech Lab thanks you for your time and interest in our research!
