# **Perceptions of Swallowing & Experiences of Dysphagia Among People with Ataxia**

The SISC Lab is seeking adults with ataxia to participate in a survey that will help us understand how people with ataxia experience and navigate swallowing difficulties.

The survey takes 20-40 minutes to complete and will guide future research into the nature and management of swallowing disorders associated with ataxia.

Eligibility:  $\geq 19$  years of age, able to read/write in English, and have a diagnosis of ataxia or are the primary caregiver for a person with ataxia
