

MASSACHUSETTS  
GENERAL HOSPITAL

NEUROLOGY

The Department of Neurology at Massachusetts General Hospital is looking for people to participate in a remote research study to develop measurement technologies that can help improve clinical trials in ataxias

### About the study:

This longitudinal study involves 1 visit approximately every 3 months for 18 months. Each visit involves 1 brief telephone call, wearing a wrist and ankle sensor for 2 weeks, and completion of surveys. The study team will ship all the supplies needed to complete the study to your home address. You will be compensated for your participation.

MGH SCA Wearables Screening  
form

Mass General Brigham IRB

APPROVAL EFFECTIVE DATE

12/8/2025

No in-person visits  
necessary
